Summary

"As an aspiring front-end developer, I'm all about creating beautiful, user-friendly websites. I've got a strong grasp of the essentials like HTML, CSS, and JavaScript, and I've ventured into the world of modern web development with React.js, where I build dynamic, interactive web applications. I also have a fondness for Tailwind CSS, which lets me design with efficiency and responsiveness in mind. When it comes to managing state and making applications run smoothly, Redux Toolkit is my trusty companion.

Though I'm a newcomer to the field, my passion for web development is unwavering, and I'm committed to keeping up with the latest trends and techniques. I'm excited to join a team where I can apply my skills, learn, and contribute to creating visually appealing, high-performance websites. Let's work together to craft digital experiences that leave a lasting impression!"

Skills

ReactJS, JavaScript, Redux, Tailwind, CSS, HTML

Personal Projects

Express Food App - Basically a clone of Swiggy

Technologies - ReactJS, Redux Toolkit, and Tailwind CSS.

- Implemented a restaurant search feature allowing users to find their preferred restaurants.
- Enabled restaurant filtering by top-rated establishments for a more personalized experience.
- Utilized React Router DOM for seamless navigation between different app components.
- Developed a user-friendly cart system, allowing users to select dishes from their chosen restaurant and add them to their cart.

MoviesBox App - A clone of Netflix.

- Developed "MoviesBox App," a Netflix clone, with user authentication via Google Firebase for secure login.
- Integrated the TMDb API to display a list of Now Playing movies and created a custom data retrieval hook for this purpose.
- Enhanced the user experience by embedding trailer videos with autoplay and mute options for an immersive movie preview.
- Implemented a lightning-fast GPT-powered search feature, complete with a user-friendly Search Page and Search Bar.
- Made the app accessible to a global audience by adding multi-language support.
- Leveraged Redux Toolkit for efficient state management, ensuring a seamless user experience.

Education

Bhagwan Mahavir Institute of Engineering & Technology, Sonapat

B.tech - Mechanical Engineering.
